

Vascular Specialists of Central Florida

Charles Thompson MD, Jon Wesley MD, Michael Muehlberger MD,
Adam Levitt MD, Shonak Patel MD

OUR MOTTO: “The only specialists board certified to treat your vascular health”. **ABOUT US:** We are a group of highly trained vascular specialists, dedicated to improving and saving the lives of our patients. We have invested our entire careers to treat conditions affecting arteries and veins. To us, comprehensive treatment of the body’s blood vessels is not a secondary business or a small part of the practice—it’s all we do. It’s our way of life. Although surgery is certainly a part of our expertise, a large part of what we do involves noninvasive and minimally invasive therapies for the management of complex peripheral vascular conditions and disease. We specialize in vascular surgery, vascular medicine, endovascular procedures and vascular imaging. We also offer the popular cosmetic procedure known as sclerotherapy and radiofrequency ablation to remove unsightly spider and varicose veins. **WHAT SETS US APART:** Vascular surgeons are the only board-certified subspecialty fully trained to treat and manage all conditions of the peripheral vascular system. We possess a unique expertise in the minimally invasive management of vascular conditions and their causes that is second to none, thanks to the advanced training required to achieve board certification from the American Board of Surgery. We work daily with patients to not only treat conditions, but also to understand the root cause of their vascular condition. Armed with the knowledge of the underlying origin of conditions may be the difference between noninvasive treatment and losing a limb in some

extreme cases; and, because we’re the only specialty with the knowledge to manage the complete vascular system comprehensively, we have the largest “toolbox” available to treat patients.
